

# TSUGAMI TECHNICAL FAIR 2025

JUN 19(Thu.) - JUN 20(Fri.) 9:00 to 16:00  
TSUGAMI NAGAOKA FACTORY

1-1-1 Higashizao, Nagaoka-shi, Niigata, Japan

Phone : +81-258-35-0850 Facsimile : +81-258-35-0905

## Greeting

We would like to express our deepest gratitude for your cooperation.

We are pleased to inform you that we exhibit our products including new models and give the demonstrations at TSUGAMI TECHNICAL FAIR 2025.

Based on our know-how of precision processing developed over many years, we offer the latest precision machines that meet the various needs of the manufacturing industry, including microfabrication, that are getting more complex and highly precise.

We look forward to seeing you at TSUGAMI Nagaoka factory.

April 2025

Sincerely,

**TSUGAMI CORPORATION**

Managing Officer (President) N. Watabe

Managing Officer

M. Matsushita

**NAGAOKA  
FACTORY**

 **TSUGAMI CORPORATION**

TSUGAMI NAGAOKA FACTORY

1-1-1, Higashizao, Nagaoka-shi, Niigata, 940-8630, JAPAN

# Accuracy, Speed and Rigidity

TSUGAMI is recognized worldwide for superior precision machine tools.

## CNC Precision Automatic Lathe

### B0205-VR

Update model of B0205-V with the latest hardware/software

### P036W

Small diameter automatic lathe with independent opposed tool posts suitable for the micro products

### B0126C

Compact type with reduced depth in B0 series

### SC206A-II

Parts feeder specification with modular tooling and a wide variety of options

## CNC Precision Automatic Lathe

### SS327-III-5AX

Automatic lathe with B-axis tool post and 5-axis simultaneous control for complex-shaped workpieces

### BW389Z

Automatic lathe for diverse simultaneous processing up to  $\phi 38$  mm by 3 independent tool posts

### B0326-III

Enhanced variations and various options for diversified workpieces

### C300-V

High-precision machining by gang-type tool post

## CNC Lathe

### M08J-III

Update model of M08J-II with enhanced machining capability and improved usability

### M08SY-II

CNC lathe with Y-axis, back spindle and live tool

### M10JL10

CNC lathe with 10 inch chuck and long stroke capable of 1,000 mm long workpiece machining

### SS20MH-III-5AX

Swiss type automatic lathe with 5-axis simultaneous control and max. 25,000 min<sup>-1</sup> tool spindle

## Turning Center

### SS38MH-5AX

Swiss type automatic lathe with 5-axis simultaneous control up to  $\phi 38$  mm

### TMA8F

Compact turning center with 5-axis simultaneous control and tool mounting at the machine front

### VA3SH

BT30 vertical machining center with tilting rotary table and direct ATC

### VA4-II

BBT40 vertical machining center with 30-tool magazine for a wide variety of products

## Turning Center

## Vertical Machining Center

## Horizontal Machining Center

## CNC Precision Cylindrical Grinding Machine

## CNC Precision Thread and Form Rolling Machine

### FMA3H-V

High-performance horizontal machining center with significantly reduced idle time while tool change

### G22

Small floor space with large tooling zone for various workpiece grinding in mass production

### G350A-500

Angular type CNC grinding machine for high-efficiency and high-productivity

### R17NC-II

CNC rolling machine capable of complicated thread and form rolling

To support our valued customers in improving their productivity and saving energy, we exhibit the machine tools equipped with various energy-saving functions in addition to the automation systems that save labor.
